DETAILED ACTION

- This action is responsive to the following communication: an amendment filed on 10/25/2009.
- Claims 1-6, 8-15 are allowed; claim 7 has been canceled.

Response to Arguments

Applicant's arguments, see pages 7-12, filed 10/25/2009, with respect to claims 1-6, 9-15 have been fully considered and are persuasive. The prior art rejection of claims 1-6, 9-15 under 35 U.S.C. 103(a) has been withdrawn.

Allowable Subject Matter

- Claims 1-6, 9-15 are allowed; renumbered as claims 1-14.

The following is an examiner's statement of reasons for allowance: The cited prior art (US 5117453 to Piasecki et al) of record teaches a telecommunication system for interconnecting a plurality of telephone communication trunks to a transmission network including an apparatus for detecting signals on the plurality of telephone communication trunks and to classify the signals, wherein the cited prior art (US 66066311 to Wang et al) of record teaches a method of measuring and providing specific levels of service within a wireless communication network. The combined references fail to teach and/or suggest associating each signal with a different class of quality of service and to distinguish, for each received signal in its entirety, the type of signal to which it belongs and to divert signals based upon its signal quality as cited in claims 1 & 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2625
